ABOUT OUR COMPANY

Solartech Energy Systems(is an entity that specialises in Solar Technology. Solartech Energy Systems delivers high quality and reliable Solar Energy services, construction and supplies services to different clients and customers, ranging from individuals to corporations and government sectors at all times.

SERVICES

AC/DC Solar Pump System

We design, supply, and install AC and DC solar-powered water pumping systems suitable for single-phase and three-phase applications. Our solutions are ideal for boreholes, irrigation, livestock watering, and community water supply projects. The systems are designed based on borehole depth, water demand, pump capacity, and solar availability to ensure efficient and reliable performance with minimal operating costs.

Home / Farm Off-Grid System

We provide complete off-grid solar power systems for homes and farms that operate independently from the national grid. These systems are capable of powering essential and heavy-duty appliances such as lighting, televisions, refrigerators, freezers, computers, phone chargers, water pumps, electric fences, and selected farm equipment, depending on system size. Each system is carefully designed to meet daily energy needs and ensure reliable power supply.

Solar Equipment Sales

Solartech Energy Systems supplies high-quality solar equipment, including solar panels, inverters (single-phase and three-phase), batteries, charge controllers, mounting structures, and all required accessories. We assist customers in selecting equipment that matches their power requirements and long-term energy goals.

Solar System Design and Installation

Our professional installation services ensure correct mounting, optimal panel orientation, and safe electrical connections. We follow industry best practices to maximize energy production, system safety, and durability under local environmental conditions. We also offer customized solar system designs based on detailed site assessments, energy usage analysis, and future expansion needs. Our designs focus on efficiency, reliability, and cost-effectiveness for residential, agricultural, and commercial applications.

Solar System Maintenance

We provide comprehensive maintenance services, including system inspections, panel cleaning, performance monitoring, fault diagnosis, and repairs. Regular maintenance ensures optimal system operation, extends equipment lifespan, and protects your investment.

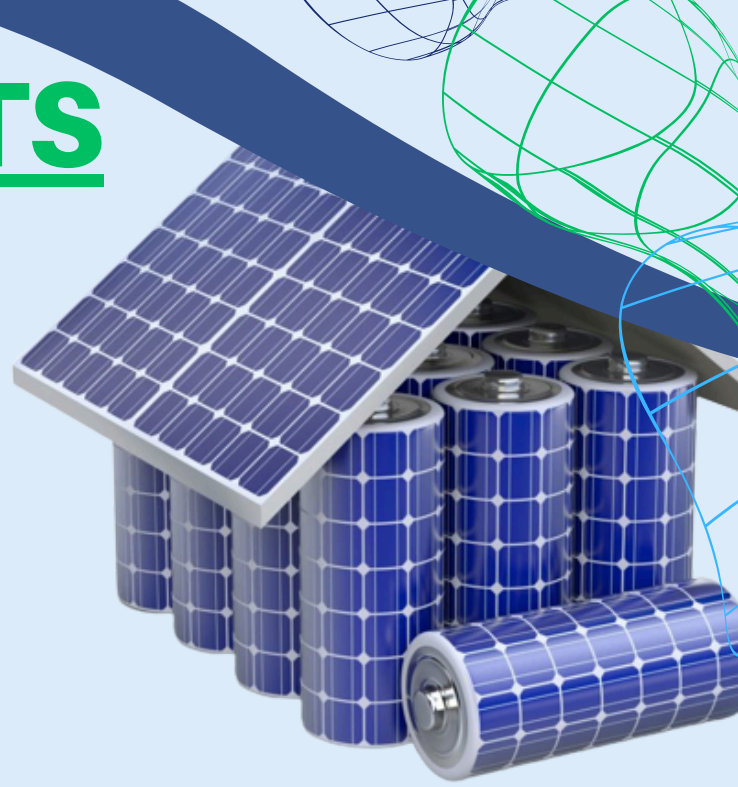

PRODUCTS

SOLAR PANELS

Renesys Solar Panels

Grade A

- 10 years Manufactures Warranty
- 25 years Product Warranty
- Suitable for large and Small projects
- Borehole Water Pumps
- Light in weight

BATTERIES

Lithium Ion (Freedom Won)

- 12V/ 24V/ 36V/ 48V
- Built-In BMS
- 2 years Warranty Life (For FW Lite Models)
- At least 10 years Service Life (4000 Cycles)
- Light in Weight

Lead Acid

- Grade A
- 10 years Manufactures Warranty
- 25 years Product Warranty
- Suitable for large and Small projects
- Light in weight

SOLAR CHARGE CONTROLLERS

Victron MPPT

- Compatible with 12V, 24V, 36V and 48V Batteries
- Bluetooth Enabled
- Low DC Voltage input, up to 450V

DC input

Victron PWM

PRODUCTS

SYSTEM ACCESORIES

DC Cabling and Components (some included in combiner boxes)

- Solar PV Cables
- Breakers (2&4 Pole)
- Fuses
- Surge Protection Devices(SPD)
- Busbars up to 1500A
- Victron fuses and Lynx devices
- Battery Switches

Victron Energy Data Cables

- Normal Network Cables
- RJ45 UTP
- RJ12 UTP
- Interface MK3 - USB (VE. Bus to USB)
- VE. Can to CAN- bus BMS

Online Monitoring

- Victron GX Device
- Fronius Wlan
- A tess Shine Master

Victron BatteryChargers

- AC/ DC Converters
- IP65 Chargers
- IP22 Chargers
- Bluetooth enabled

INVERTERS

Off- Grid (Victron)

- Phoenix Inverters for completely off grid users
- Inverter/ Chargers can be used as back-up power supply(Quattro and MultiPlus Inverters)
- AC Inputs and can synchronize with the electrical grid or generator.
- Power assist and Power control to help boot grid, or generator power.
- Can be configured for ESS systems and feed back excess power to the grid.
- Works with 12V, 24V and 48V compatible batteries with BMS.
- 2 years Warranty Life
- At least 10 years service life

Grid- Tie (Fronius Inverter)

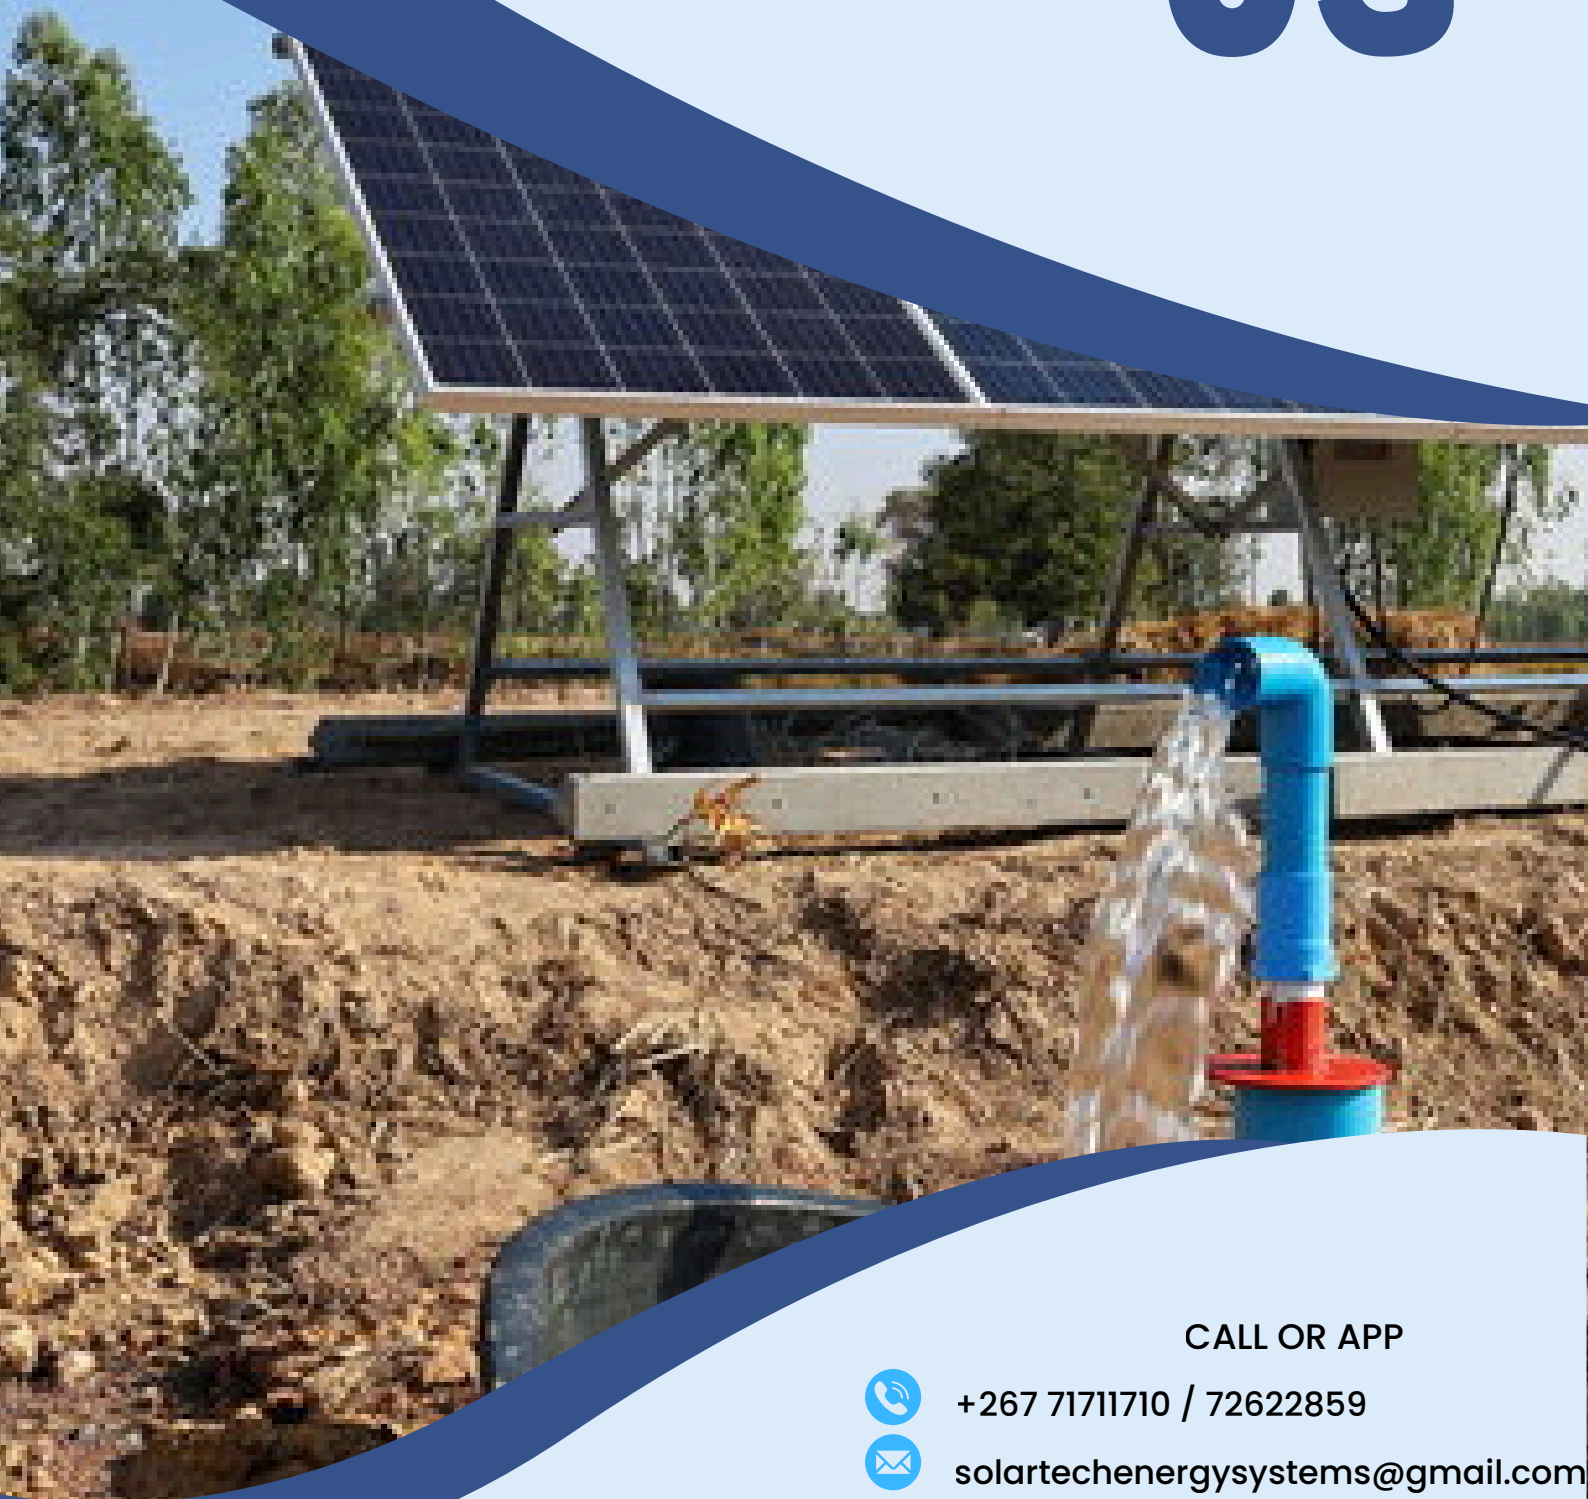

- For Single Phase systems
- Can Work in Microgrid Systems
- Internet connection for online monitoring
- Smart Meter Configuration
- Diesel Generator Coupling
- 2 years Warranty Life
- 10 years service life

Hybrid (ATESS)

- For three phase systems
- For large scale systems and Grid supports
- Automatic Transfer Switch(ATS)
- Online Monitoring
- 2 years WarrantyLife
- 10 years ServiceLife
